WonderPlugin Carousel

This tutorial will show you how to add a recent post carousel or a category post carousel to your website. You will find how easy it is to automatically update your carousel using WonderPlugin Carousel.

**Step1. Prepare the post with specific configuration**

1. In the post editor, click the Screen Options tab on the top right, make sure you tick the boxes of Categories, Featured Image and Excerpt.

2. Choose the categories. You can select one or more categories. The category is one of the filter selections when you create the post carousel.

3. Set the featured image. The featured image will be added to the carousel as the post image.

4. Fill in the excerpt filed. The excerpts are optional summaries of your post content that can be used as the description of the carousel item.
Step 2 create the post carousel

1. Move your mouse to the WonderPlugin Carousel under the dashboard on the left side of your page. This will show you options for your carousel. Choose “New Carousel”.

3. Click the drop-down menu of “Select Posts”. Then choose the item from “Recent Post” or “Category”. If you choose “Recent Post”, the carousel will display all of the recent posts up to the number you set. If you choose “Category”, the carousel will only display the posts which are belonging to the category you select. Click OK button.

4. In the “New Carousel” page, click the step2 “Skins” tab, choose the skins you like. Only some of the skin will display the excerpt as well as the featured image.
5. Click “Save & Publish” button. You can click “View Carousel” to preview the carousel. If you are not satisfied with the one you just created, click “Edit Carousel “, this will take you to the “Edit Carousel” page. Then repeat step 3 and 4. If you are happy with the carousel, you only need to copy the shortcode or php code.

To embed the carousel into your page, use shortcode: [wonderplugin_carousel id="8"]

To embed the carousel into your template, use php code: <?php echo do_shortcode('[wonderplugin_carousel id="8"]');?>

6. Open the page or post you want to insert the post carousel, paste the code in the “Text” window. Then click the “Publish” or “Update” button on the right side of the page.
